/ Ito double

A green future for your shelter

Verhofsté
shaping open spaces

/ GENERAL

Ito double is an elegant steel canopy with green roof. Thanks to its design, the space under the canopy is being maximized. This allows this canopy to function as a bike shelter, carport or playground shelter.
This canopy can be combined with the Verhofsté street furniture and it is equipped with an integrated rainwater drain.
A nice extra is that the canopy can be extended with the other canopies from the Ito family. As a result, combinations are endless!
